

Decision
through
Holistic
Intelligence

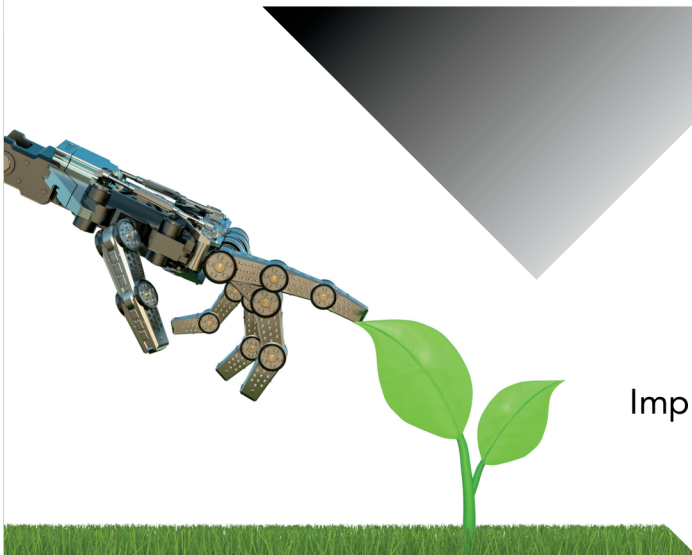

Evidence-based insights to make **sustainability** decisions for your organisation and the world.

Companies attempting to enhance their sustainability tracking efforts are currently being offered suboptimal solutions.

- Globally, public companies are spending an estimated \$5B annually on compliance tracking
- Existing tools provide surface-level analysis, lacking contextualization

DHI PROPRIETARY AI OFFERS HOLISTIC & CONTEXTUALIZED SOLUTIONS FOR SUSTAINABILITY RISK COMPLIANCE

- ✓ Qualitative Analysis - evaluate risk
- ✓ Natural Language Processing - assess sentiment
- ✓ Bayesian Networks - predictive modeling and anomaly detection
